OvisLink Wireless Headset Quick Instruction

(Bluetooth 5.0)

Headset Power LED

Charging Port

Power LED
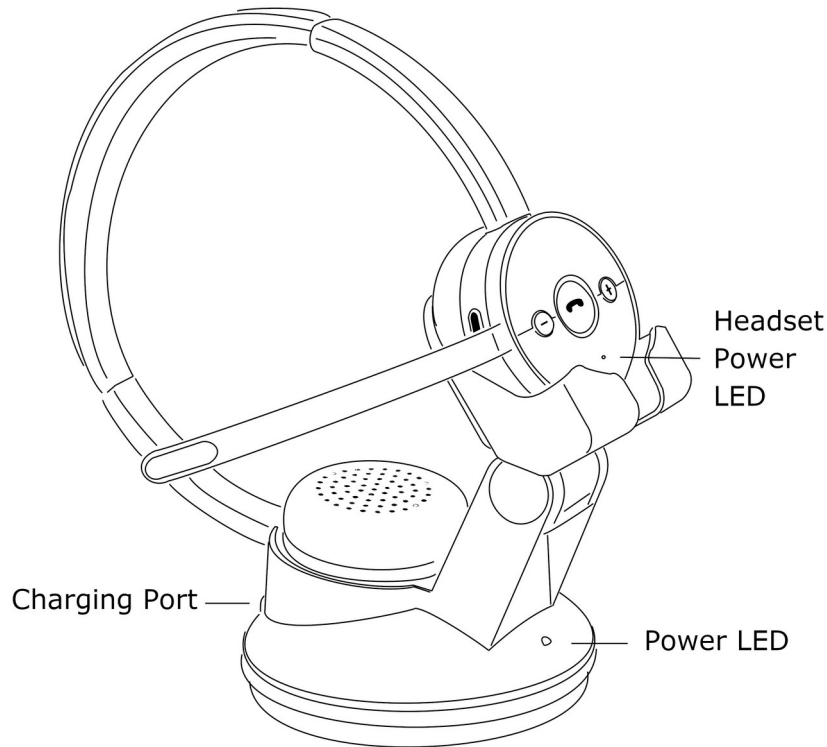

Charge before use

1. Connect the headset's Charging port to a USB cellphone charger or a computer's USB port with the included Charging cable. The headset LED glows red when charging the battery.
2. When using the dock to charge the dual ear headset, be sure that the microphone side of the headset faces upwards, while the headset LED glows red.
3. Once the battery is fully charged the battery LED will turn Green. Then it will turn itself off.

Headset Power Switch

- To turn on the headset, slide the on/off switch into the "on" position. The power LED will flash Blue. Once it is connected to a device, it will turn solid Blue.

Slide the power switch to the "Off" position to turn off the headset.

Power LED

- Red when charging battery
- Flashes blue tells it is in pairing mode
- Solid blue when headset is connected to a device

Pairing

- Turn the headset power switch to the "On" position, the headset's LED will flash and start pairing.
- Find the device named "OvisLink" in your device's Bluetooth settings and click pair to pair and connect them.
- Once connected, the headset's LED will turn solid blue.

Use the Headset

- Press the multi function button on the headset to talk and disconnect.

Headset volume

- Press the + key to increase the volume
- Press the – key to decrease the volume
